

Zijie Wang

zijiewang@arizona.edu | [wang-zijie.github.io/](https://github.com/wang-zijie)

EDUCATION

University of Arizona

Doctor of Philosophy, Computer Science

- Advisor: Dr. Eduardo Blanco

Tucson, AZ, USA

Aug. 2022 – Expected May 2026

Arizona State University (Transferred with advisor)

Doctor of Philosophy, Computer Science

- Advisor: Dr. Eduardo Blanco

Tempe, AZ, USA

Jan. 2022 – Aug. 2022

Arizona State University

Master of Science, Computer Science

- Thesis Track, Advisor: Dr. Jia Zou

Tempe, AZ, USA

Aug. 2019 – Dec. 2021

Beijing Information Science & Technology University

Bachelor of Engineering, Computer Science and Technology

Beijing, China

Sept. 2015 – June 2019

RESEARCH INTERESTS

Natural Language Processing, Large Language Models, and Agentic AI

PUBLICATIONS

EXPERIENCE

Amazon Web Services (AWS), AWS Security Agent

Applied Scientist Intern

Seattle, WA, USA

Aug. 2025 – Dec. 2025

- Developed an LLM-as-a-Judge framework for evaluating LLM agent workflow.

Dolby Laboratories, Advanced Technology Group

PhD Research Intern

Atlanta, GA, USA

May 2025 – Aug. 2025

Mentor: Pranav Maneriker, Manager: Fan Du

- Developed a novel Audio-Video Question Answering benchmark focusing on question ambiguity. Ongoing research work.

University of Arizona, Department of Computer Science

Research Assistant

Tucson, AZ, USA

Aug. 2022 – May 2025

Advisor: Dr. Eduardo Blanco

Selected research projects:

- Leveraging Commonsense Reasoning with Negation for Negation Understanding.
We present a data augmentation method to develop large-scale Commonsense reasoning dataset with negation. Comprehensive experiments demonstrate that this dataset is beneficial for LLMs to understand negation. **(One first-author paper published at Findings of ACL 2026 [1])**
- Identifying and Answering Questions with False Assumptions.
We propose a method based on evidence retrieval to identify questions with false assumptions. We develop an assumption extraction approach that answers the questions with interpretability. The combined approach yields SOTA on three datasets with human validated interpretability. **(One first-author paper published at EMNLP 2025 [2])**
- Interpreting Indirect Answers to Yes-No Questions.
We develop the largest yes-no question datasets so far across multiple domains (three domains) and multiple languages (nine languages). We investigate a distant supervision method that leverages auto-labelled data to interpret the indirect answers to yes-no questions.
Two first-author papers published at Findings of NAACL 2024 [3] and Findings of EMNLP 2023 [4]

AWARDS

College of Science Fellowship

Aug. 2025

OpenAI Researcher Access Program Credits

Jan. 2025

EMNLP 2024 Outstanding Reviewer

Dec. 2024

UofA GPSC Travel Fund Award

Dec. 2023

Department of Cognitive Science Travel Award

Nov. 2023

Outstanding Graduates, Beijing City

June 2019

SKILLS

Programming Language: Python, Java, Perl, Scala, SQL

Machine Learning & NLP Tools: PyTorch, TensorFlow, Keras; vLLM, LangChain, NLTK, spaCy

Language Models: (Encoder and Decoder-based) Transformers, GPT-X, Llama, DeepSeek R1 etc.

SERVICES

Conference review: ACL 2023, EMNLP 2023, AACL 2023, ACL Rolling Review (regularly)
